

OCTOBER 2015

Crete Elementary School

"JEDI MATH NIGHT"

MAY THE FACTS BE WITH YOU!

Crete Elementary Principal Erin Lane presented highlights from the school's recent "Jedi Math Night" which also featured science concept activities. Parent workshops were held to help parents assist their children with math fact strategies, along with problem solving activities pertaining to science and math. There were over 100 people in attendance for this event; roughly 20-30% of the school families. Many of the students who normally receive math intervention were also in attendance. Board members commended the building administration for communicating this opportunity for parents to become more involved in learning activities for their children. Principal Lane publicly commended Crete Elementary Math Interventionist, Mrs. Lisa Miller, for her diligent work with math consultant, Mr. Bill Hanlon, to learn and share math strategies with students and their parents.
